EXPERIENCE

AtlantaSanad Insurance

11-2024 - Present

Software Engineer | Oracle APEX & PL/SQL Developer

Casablanca, Morocco - On-site

- Develop and enhance enterprise business applications using Oracle APEX, PL/SQL, and Oracle Database, including dynamic forms, workflows, dashboards, and business processes.
- Participate in requirements analysis and solution design, developing SQL/PL/SQL processes, and integrating REST APIs to support configurable business solutions.
- Contribute to application process optimization, ongoing maintenance, and incident resolution.
- Develop Jasper Reports-based business reports to support operational and reporting workflows.

OFFZONE Agency

02-2024 - 08-2024

Full Stack Engineer Java/Spring Boot/React JS - Intern

Taza, Morocco - Remote

- Design and development of a digital health platform bringing together various actors in the medical sector to optimize clinical processes and improve the quality of care, using React.js for the frontend and Java Spring Boot for the backend.
- Implemented Spring Security to manage the platform's security features.
- Created Docker images, enabling continuous integration and rapid deployment.
- Reduced bugs through rigorous testing with JUnit 5 and Postman, ensuring high reliability and performance of the platform.
- Managed project source code and versioning with Git and GitHub.
- Collaborated with the team using project management tools such as Jira, Slack, and Microsoft Teams.

Redgato Web Services

07-2023 - 09-2023

Full Stack Engineer Java/Spring Boot/Angular - Intern

Al Hoceima, Morocco - On-site

- Design and development of a web application that simplifies accounting for various types of businesses by applying Microservices Architecture, using Angular for the frontend, Java Spring Boot for the backend, and SQL/MySQL for the database.
- Used Postman to test and validate REST APIs.
- For project management and team collaboration, we utilized Jira and Confluence, while managing our source code with Git and GitLab.

EDUCATION

National School of Applied Sciences Al Hoceima

2019 - 2024

Diploma: State Engineer in Software Engineering

Al Hoceima, Morocco

Al Massira Al Khadra High School

2018 - 2019

Baccalaureate in Physical Science, French Option

Tiznit, Morocco

PROJECTS

Offline AI Developer Assistant - In development | Spring Boot, React, Ollama, Local LLM, REST API

- Built a local AI developer assistant using Spring Boot, React, Ollama, and REST APIs, enabling users to upload projects and interact with their source code through conversational queries.
- Implemented project analysis and document retrieval capabilities to provide context-aware responses without relying on external AI APIs.

Women in Tech — Online Training Platform | Java, Spring Boot, PostgreSQL, Docker Compose, React

- Contributed to an online training platform aimed at helping women in Cameroon develop IT and vocational skills.
- Participated in UML modeling, UI/UX prototyping using Uizard, and backend development.
- Collaboration using Git/GitHub.

Shared Bill Tip Calculator Mobile App | Java, XML, Firebase, Android Studio

- Development of an Android application to calculate shared bills and tips, including authentication and data storage.
